01

The chair that answers for everything

One seat answers for Guangzhou, the Dar floor, Finance and Customer Care at once.

MISSION

What this chair is for

This chair exists to read the whole business on one screen and to sign off the decisions nobody else may take — **not to run the daily operation**. If you find yourself registering cargo or releasing boxes, something upstream needs attention instead.

YOURS ALONE

The decisions with a cost attached

Compensation payouts, costs above the threshold, staff and their access, the prices customers are told, and permanent deletion. No other role holds any of these — not even Finance.

DELIBERATELY SPLIT

Approving is never paying

You approve a payout; Finance disburses it. You approve a cost; Finance's payment is what actually moves money. **One desk deciding and paying is how money leaves a business quietly.**

YOUR DAY	WHAT IT MEANS
Land on the executive view	A dashboard no other role sees.
Read what needs a decision	Grouped by the desk that owns the fix, ranked by severity.
Scan every desk	Four cards. Read the problem line, not the figure.
Clear the case decisions	Compensation and assignment are yours alone.
Sign off the big costs	Approving books no money. It only unlocks the payment.
Read the position	Cash available, then what the business actually earned.

What you may and may not do

YOU MAY

See everything, decide the rest

Every screen in the system · approve compensation and assign a case · approve any cost above the threshold · read the profit and loss (withheld even from Finance) · create staff, change roles, reset passwords, switch access off · restore a deleted consignment or erase one permanently · change the collection accounts, offices and numbers customers see.

YOU MAY NOT

Lock yourself out, or rewrite the record

Deactivate your own account · change your own role · edit or delete anything in the audit log, including your own actions · approve a payout twice or on a finished case · erase a record that still has an invoice, or that flew on a dispatched batch · erase anything without typing its tracking number exactly.

WHY THE LIMITS EXIST

These constraints exist because you are the one person nobody can overrule. They are what make the record worth trusting when you are the one being asked to explain it.

02

Signing in

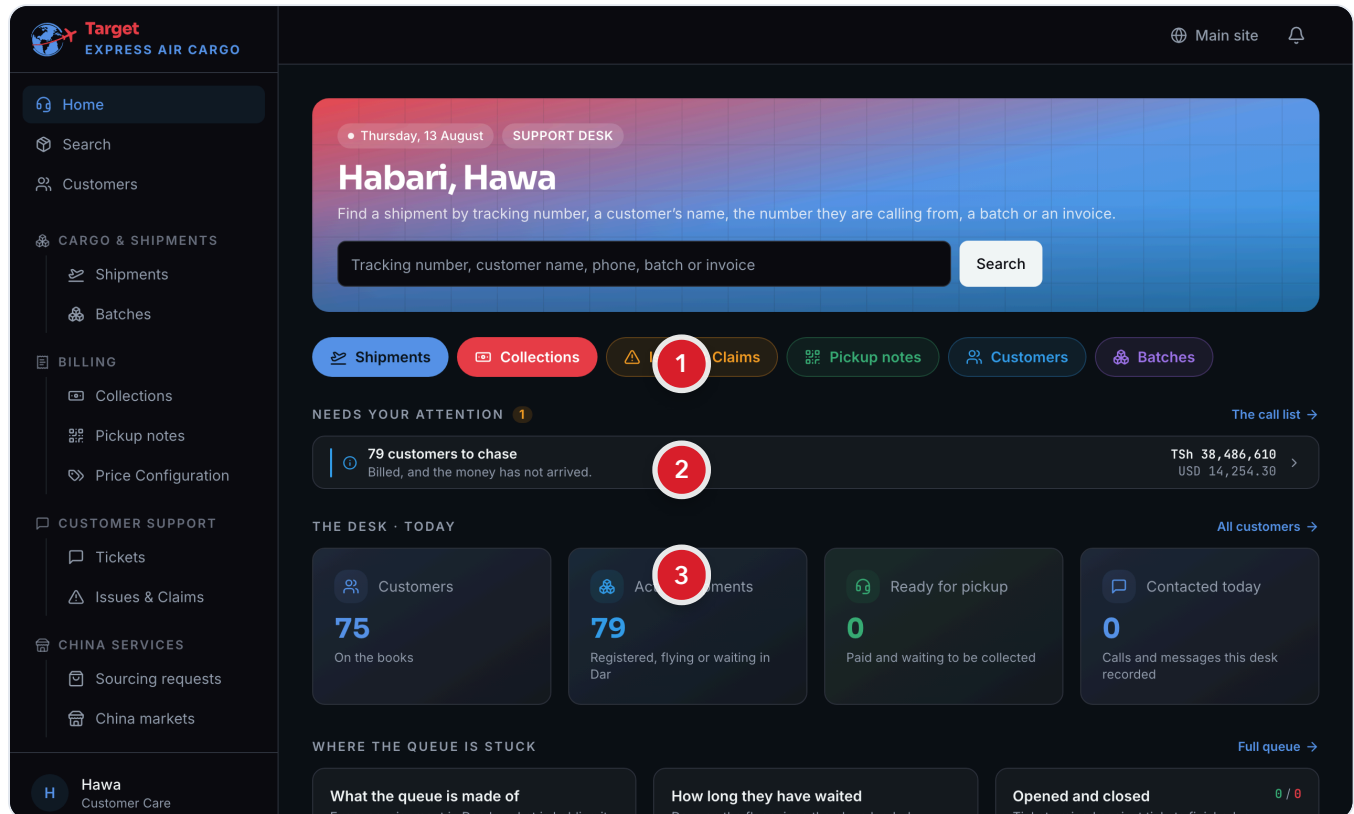

One address, one account, and a view no one else has.

STEP 1

The login screen

target-epress.vercel.app

Type your work email and password. You land on the executive dashboard — the only role that sees it. The language switch sits at the bottom of the sidebar; press `Ctrl+L` and the whole system follows.

1 Email

e.g. ceo@targetexpress.co.tz

ceo@targetexpress.co.tz

2 Password

Change it from Profile. You cannot lock yourself out — the system refuses that by name.

“ ”

3 Sign in

Straight to the executive dashboard.

NEVER DO THIS

Never share this account. It is the only one that can approve a payout, change a rate customers are quoted, or erase a record permanently — and every one of those carries your name for good.

03

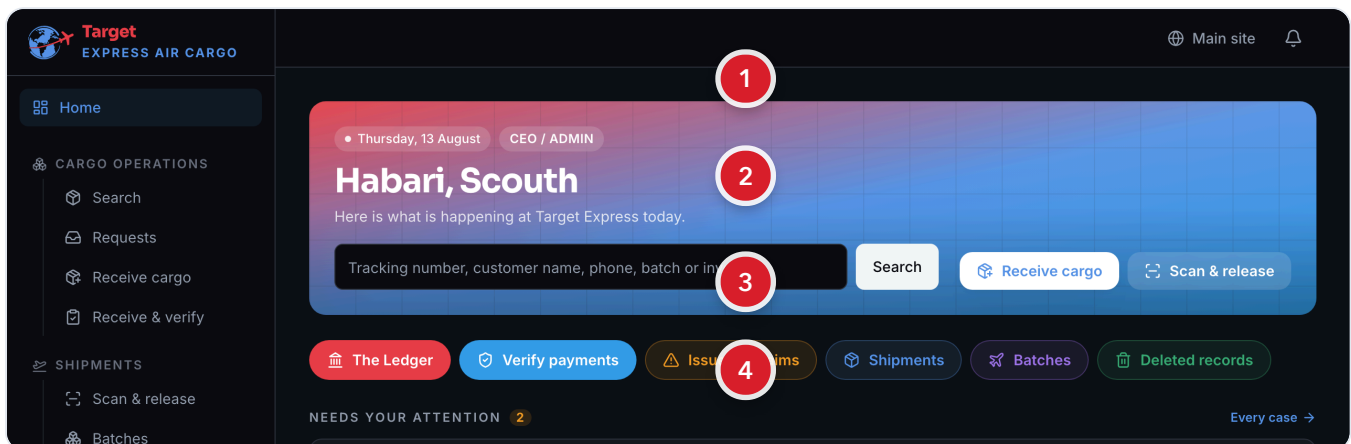

The executive dashboard

Every desk at once, with the problems surfaced rather than the totals.

Home, section by section

/app/dashboard

This screen answers the three questions only this chair asks: where is all of it, how is each desk, and is the money keeping up.

1 The greeting banner

Your name and the CEO badge. **The Receive cargo and Scan & release buttons are not your job** — they render because you hold those permissions, not because you should use them.

“ ” “ ” — —

2 Needs your decision

One bounded, filterable panel grouped by the desk that owns the fix — Guangzhou, Dar floor, Finance, Support, Cases — ranked critical, warning, info. It never grows into an endless stack.

— — — —

3 Every desk, right now

Four cards: Guangzhou, the Dar floor, Finance, Customer Care. **Read the problem line, not just the figure.** A high number with no problem line is a busy desk working properly.

4 Business health

Revenue this month, outstanding, delivered, and the three-day promise. Shillings lead; the dollar figure is what the invoice says.

TIP

An empty panel says **“Nothing needs your decision. Every desk is clear.”** That is a real statement, worded deliberately differently from a panel that failed to load.

“

”

04

The sidebar, menu by menu

You can reach every screen. These are the ones only you can use.

The screens only you can use

MENU	WHAT IT IS, AND WHEN TO USE IT
Issues & Claims /app/exceptions	Approving a payout and assigning a case. Yours alone.
Expenses /app/finance/expenses	Signing off costs above the threshold before they can be paid.
Reports · Profit & loss /app/finance/reports	What the business earned, on both bases. Withheld even from Finance.
Staff /app/admin/users	Accounts, roles, passwords and access. You cannot alter your own.
Deleted records /app/admin/deleted	Restore a deletion, or erase it permanently under four conditions.
Company settings /app/admin/settings	Collection accounts, offices and numbers — what customers are told. — —
Price Configuration /app/finance/pricing	The rate book every quote in the business comes from.
China markets /app/admin/markets	The market directory Customer Care reads from.
Audit log /app/admin/audit	Every privileged action. Append-only, including for you.
General ledger /app/finance	Cash available, derived from the ledger and never typed.

05

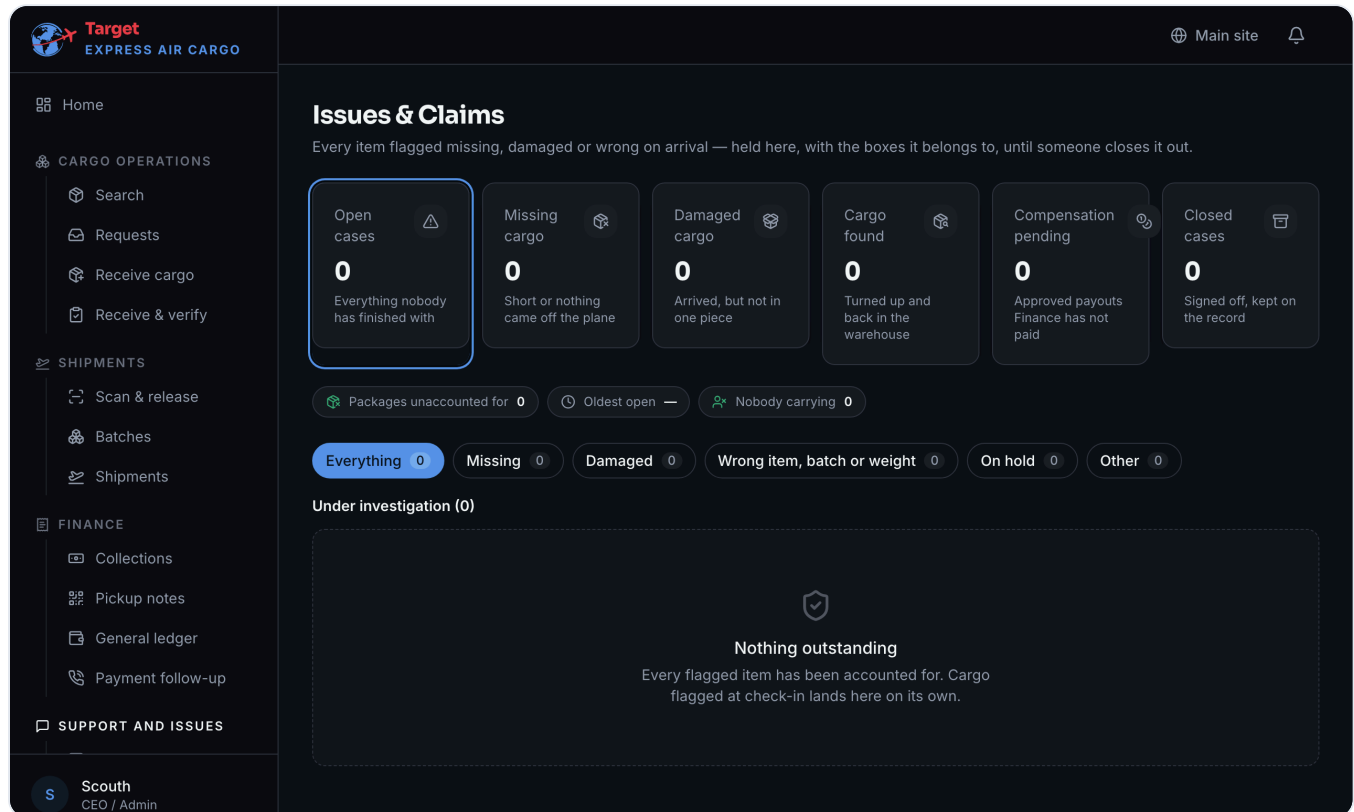

Every screen in detail

The picture, every control, and why it is there.

Issues & Claims – the decisions only you make

/app/exceptions

Approve a payout, or assign a case to a named person. Both are yours alone — Customer Care and the warehouses can move a case along and gather evidence, but neither can decide it. Closing a case needs a resolution written down.

- 1 **Approve payout**
Refused on a finished case, and refused a second time on the same case.
- 2 **Assign to someone**
Puts a name against the investigation so it stops being everyone's problem.
- 3 **Finance disburses**
You approve; they pay. The two are deliberately different desks.

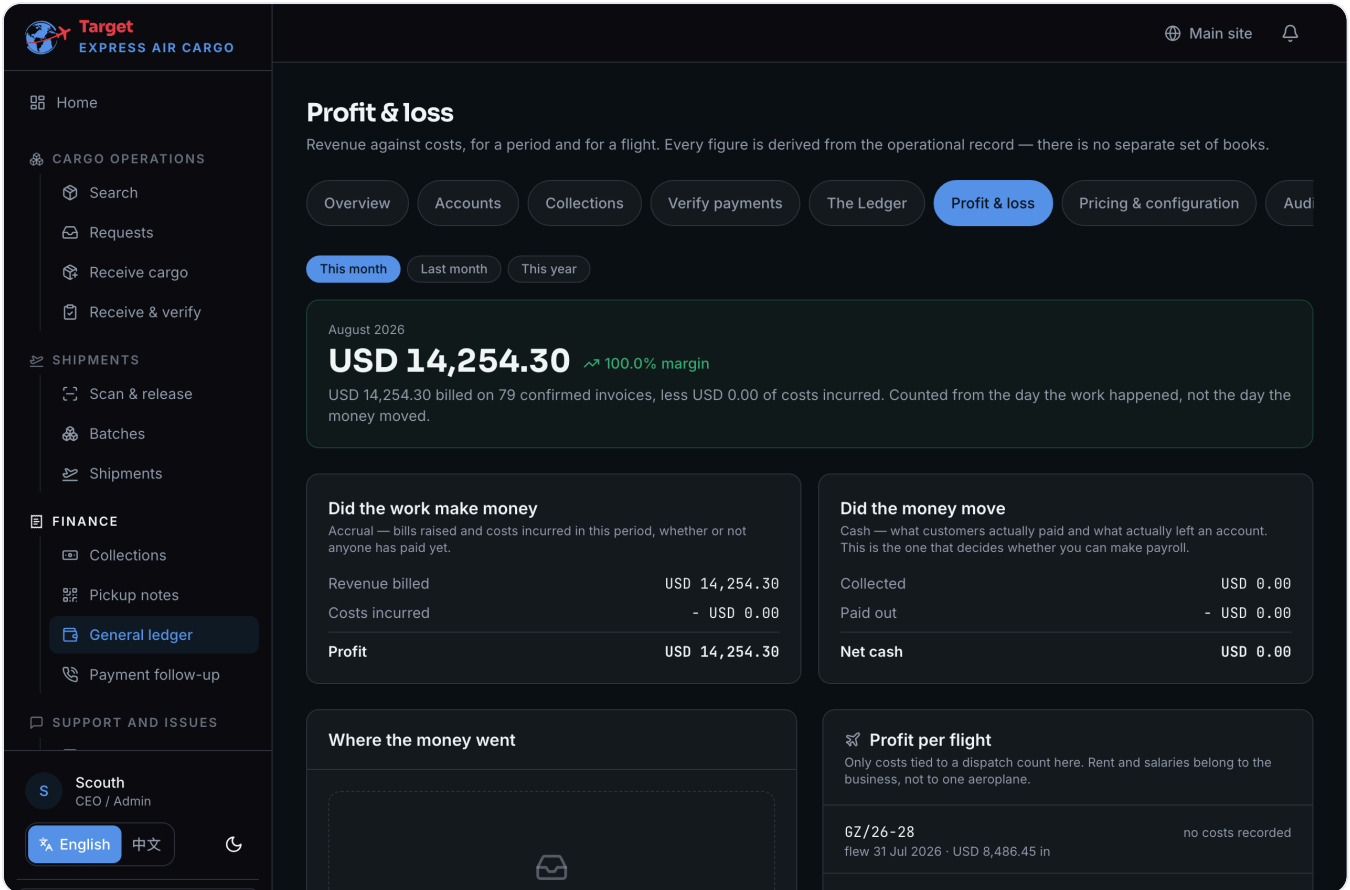

CAREFUL

Approving books no money. It only unlocks the payout for Finance to make. Confirm both halves happened before you consider a claim closed.

Profit & loss – the report withheld from Finance

/app/finance/reports

Two bases side by side: what the work earned (bills raised and costs incurred) and what actually moved (money in and out). **They always disagree, and both are true.**

NEVER DO THIS

Quoting the cash figure as profit in a month with a big collection is how a bad month reads as a good one. Say which basis you mean, every time.

Staff – people and access

/app/admin/users

Create an account, change someone's role, reset a password, or switch access off the moment someone leaves. Each name opens to their own record and activity.

Target EXPRESS AIR CARGO

Staff
Create accounts, move people between departments, and switch access off the moment someone leaves.

NAME	ROLE	LAST LOGIN
Aziza finance@targetexpress.co.tz	Finance	Save 57 seconds ago

1 Role

Decides every screen that person can reach. Changing it changes their whole system.

2 Access

Switch it off the day someone leaves. Their record and history stay.

3 Your own row

Rendered as a badge, not a dropdown. You cannot change your own role or deactivate yourself.

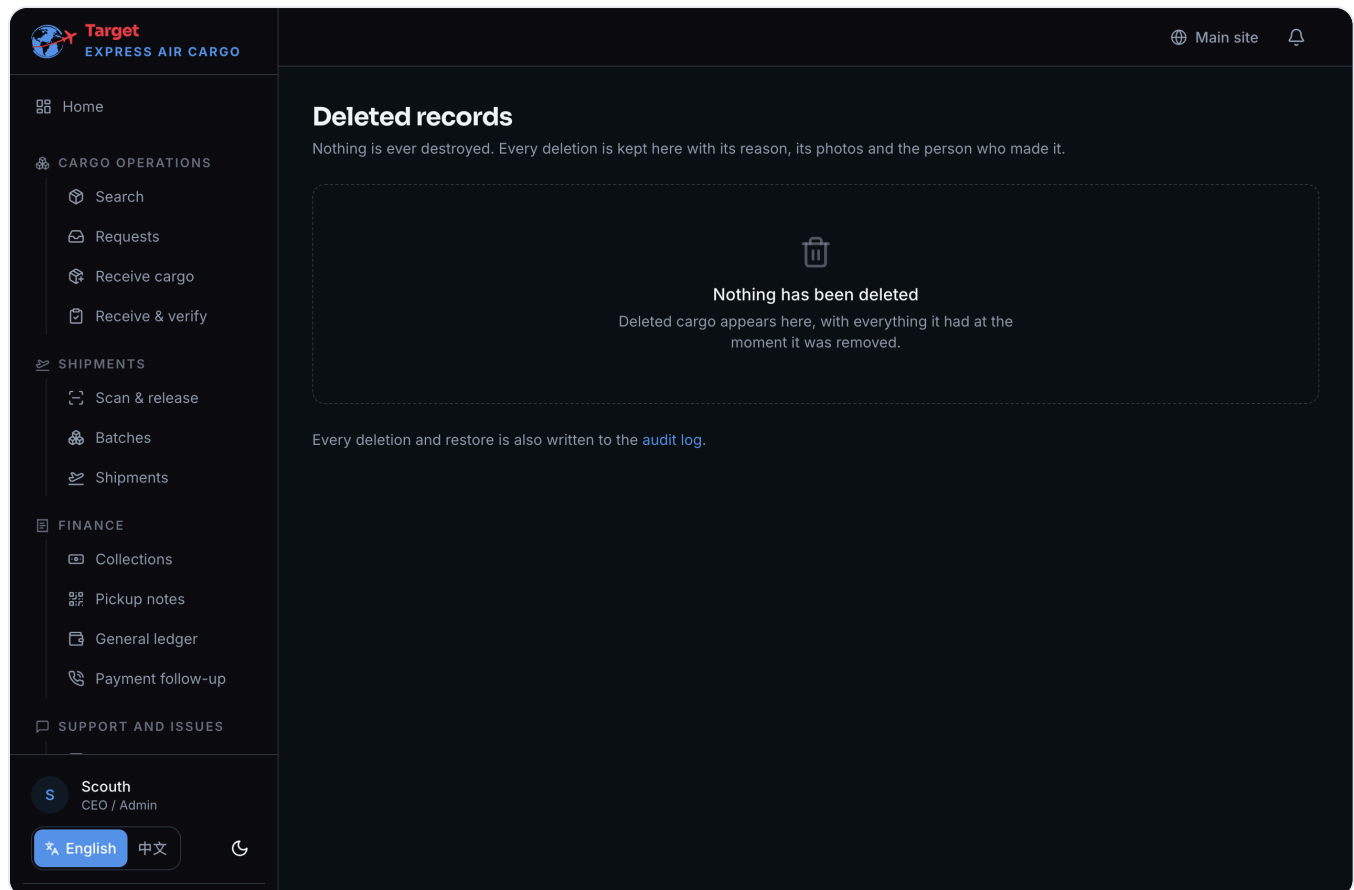

TIP

New Guangzhou accounts open in Chinese automatically; every Tanzanian desk opens in English. Whatever the person chooses afterwards is stored against them and wins.

Deleted records – restore or erase

/app/admin/deleted

Every soft-deleted consignment, with the reason, who deleted it, and its photographs preserved. An ordinary delete is a timestamp, a person and a reason — **nothing is destroyed**.

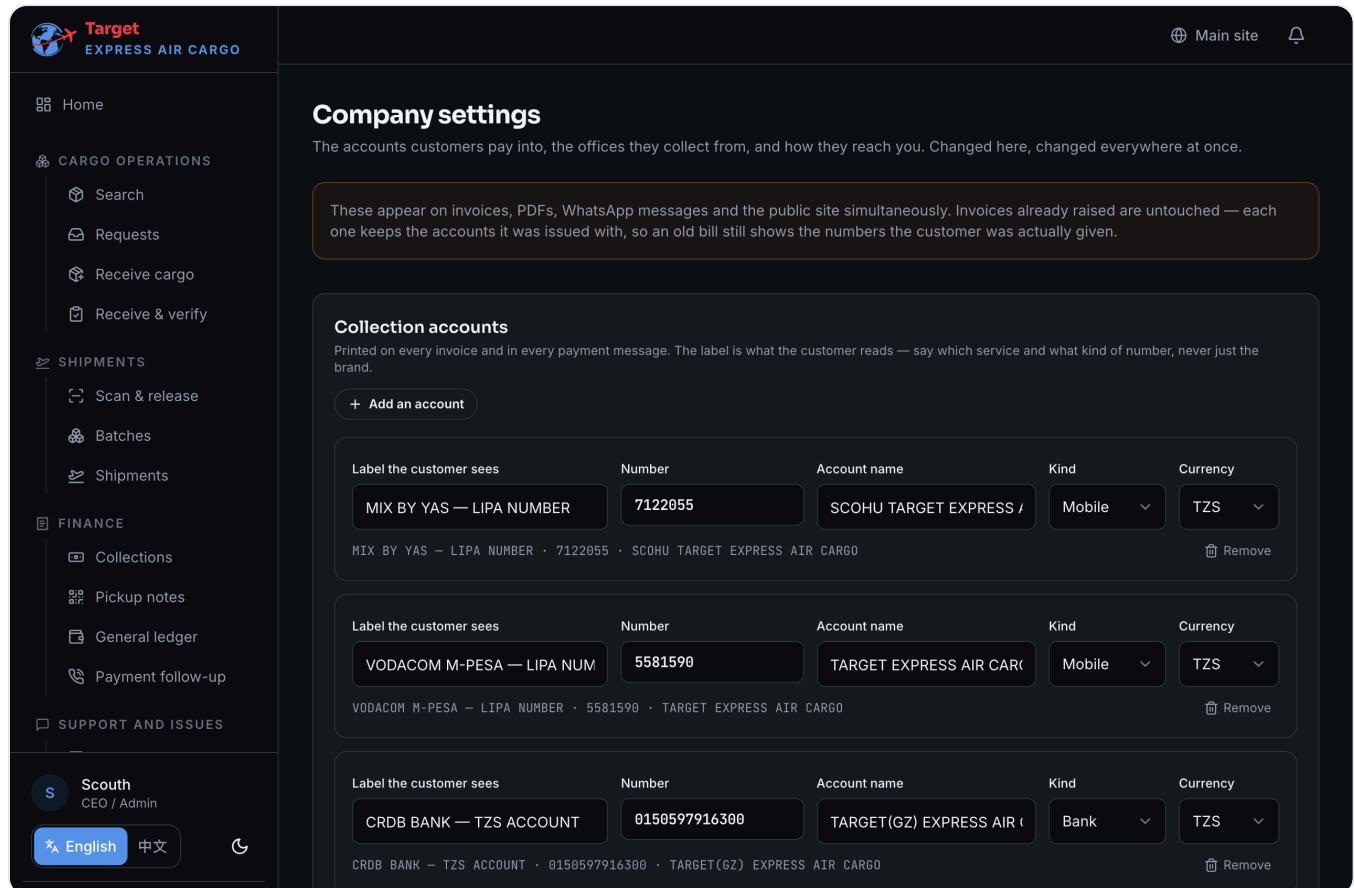

NEVER DO THIS

Permanent erasure refuses a record that is not already deleted, one with any invoice against it, and one that flew on a dispatched flight — and it demands the tracking number typed exactly. **Every one of those refusals is protecting the record, not obstructing you.**

Company settings & Pricing

</app/admin/settings> · </app/finance/pricing>

Collection accounts, the Tanzania and China office addresses, and the contact numbers. Pricing is the rate book every quote comes from — change a figure there and cargo, invoices, tracking and reports all follow.

SUPPORT AND ISSUES

Scouth
CEO / Admin

English 中文

Company settings

The accounts customers pay into, the offices they collect from, and how they reach you. Changed here, changed everywhere at once.

These appear on invoices, PDFs, WhatsApp messages and the public site simultaneously. Invoices already raised are untouched — each one keeps the accounts it was issued with, so an old bill still shows the numbers the customer was actually given.

Collection accounts

Printed on every invoice and in every payment message. The label is what the customer reads — say which service and what kind of number, never just the brand.

+ Add an account

Label the customer sees	Number	Account name	Kind	Currency
MIX BY YAS — LIPA NUMBER	7122055	SCOHU TARGET EXPRESS /	Mobile	TZS
MIX BY YAS — LIPA NUMBER · 7122055 · SCOHU TARGET EXPRESS AIR CARGO				
Remove				
VODACOM M-PESA — LIPA NUM	5581590	TARGET EXPRESS AIR CARC	Mobile	TZS
VODACOM M-PESA — LIPA NUMBER · 5581590 · TARGET EXPRESS AIR CARGO				
Remove				
CRDB BANK — TZS ACCOUNT	0150597916300	TARGET(GZ) EXPRESS AIR C	Bank	TZS
CRDB BANK — TZS ACCOUNT · 0150597916300 · TARGET(GZ) EXPRESS AIR CARGO				
Remove				

CAREFUL

Saving an empty account list is refused outright: **an invoice with nowhere to pay is worse than no invoice**. Invoices already raised keep the accounts they were issued with. Add the new account before removing the old.

Audit log – settling arguments

/app/admin/audit

Every privileged action, searchable by summary, action or user, and filterable to shipments, batches, invoices, payments, pickup notes or staff.

NEVER DO THIS

Nothing here can be edited or removed — **including by you**. If a mistake is in the log, the fix is a new entry, never a correction. That is the only defence against “the number changed and nobody knows when”.

“

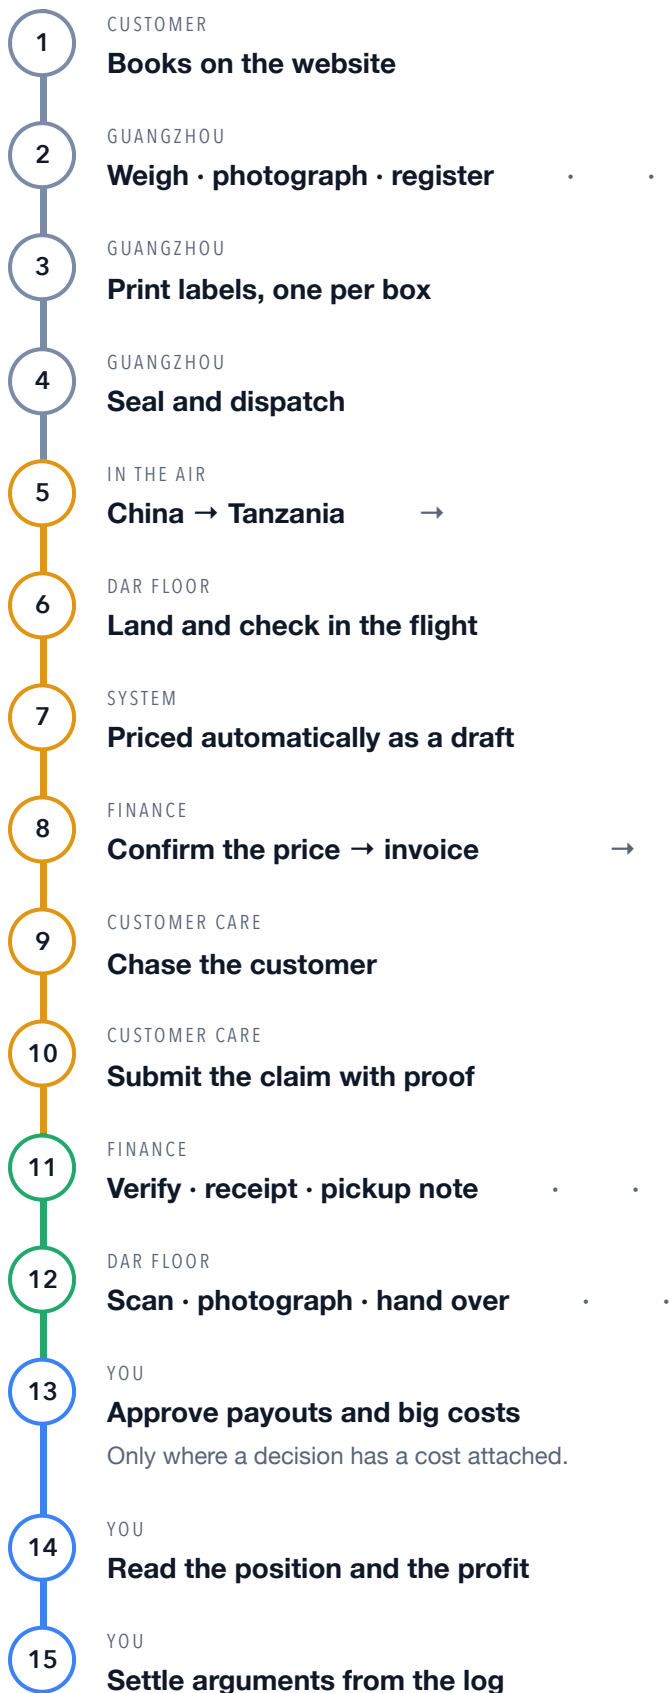

”

06

The complete journey

What every desk below you is doing, and where you sit in it.

Fifteen steps, five departments

07

A worked example

One consignment, and the two places you touch it.

TX-000042 · a claim and a cost

TX-000042 ·

CUSTOMER	TRACKING	INVOICE	CLAIM
John Peter	TX-000042	USD 48.60	USD 180.00

STAGE	WHAT YOU DO
A box is missing	The Dar floor cannot find one of John's two cartons. They press 'Unable to locate', write where they looked, and a case opens automatically. You are notified; they are not able to decide it. John “ ”
You investigate	You open Issues & Claims, read the Guangzhou photographs and the check-in record, and assign the case to a named person so it stops being everyone's problem.
You approve	The box is genuinely lost. You approve compensation of USD 180. This books no money — it unlocks the payout for Finance. 180 — —
Finance pays	Finance disburses it from a named account. Only now has money actually left the business.
You check	You open the Audit log and confirm both halves happened: your approval, and Finance's payment. Two entries, two names, two timestamps.

08

When things go wrong

The mistakes this chair actually makes.

Common mistakes

THE MISTAKE	WHAT IT CAUSES	WHAT TO DO
Doing another desk's work	Your name lands in the middle of a record that should be theirs.	Send it back to the desk that owns it.
Reading the figure, not the problem line	A busy, healthy desk looks like a crisis; a real one gets missed.	Read the line underneath the number.
Quoting cash profit as profit	A month with a big collection reads as a good month when the work lost money.	Read both bases and say which you mean.
Comparing a shilling card with a dollar card	A conclusion out by a factor of thousands.	Shillings lead; the dollar figure is what the invoice says.
Treating approval as payment	You believe money has left when it has not, or the reverse.	Approve, then confirm Finance actually paid it.
Emptying the collection accounts to tidy up	Refused — and if it were not, invoices would have nowhere to pay. — —	Add the new account before removing the old.

09

Working well

Habits that keep the whole record worth trusting.

Best practice

DECIDE

Decide, do not operate

If you are registering cargo, a desk below you needs attention instead.

BOTH HALVES

Approving is not paying

Your signature unlocks the money; Finance moves it. Confirm both happened.

NUMBERS

Say which number you mean

Two profit bases, two currencies. Most bad decisions here are a comparison, not a calculation.

PEOPLE

Switch access off the same day

Their record and history stay; only the door closes.

DELETION

Restore before you erase

A soft delete keeps everything. Permanent erasure is for genuine mistakes only.

THE LOG

Settle from the record

Append-only, including for you. If a mistake is in it, add an entry — never correct one.

— —

10

Questions people ask

The ones that come up in the first month.

Frequently asked

QUESTION	ANSWER
Why can I not deactivate my own account?	Because it would leave the company with no way back into its own system. The refusal is by name.
Can I correct a wrong entry in the audit log?	No — including you. Add a new entry explaining it. That immutability is what makes the log worth anything. — —
Why does Finance not see the profit report?	Deliberately withheld. Finance keeps the books; the profit is the owner's question to ask of them.
How do I change what a customer is charged?	Price Configuration. Change it there and cargo, invoices, tracking and reports all follow.
A staff member has left today.	Switch their access off from Staff. Their record and everything they did stays on the system.
Can I delete a customer's whole history?	No, and you should not want to. Permanent erasure refuses anything with an invoice against it.

11

Summary

What to remember when everything else is forgotten.

This chair in one page

1

Decide, do not operate

If you are doing another desk's work, that desk needs attention instead.

2

Approving is not paying

Your signature unlocks the money; Finance moves it. Confirm both halves.

3

Say which number you mean

Two profit bases, two currencies. Most bad calls here are comparisons.

IF YOU REMEMBER ONE SENTENCE

Every other desk is built so it cannot do your job. Keep it that way — the separations are what make the whole record worth trusting.

— —
